

China Industrial Water Markets

Publication information	ii
Executive summary	iii
Capital expenditure on industrial water and wastewater treatment in China, 2013–2020	iii
Opportunities	iii
Capital expenditure on water and wastewater treatment by industry in China, 2013–2020	v
Partnerships and market players	v
1. Introduction	1
1.1 Market drivers	1
1.1.1 Water scarcity	2
Figure 1.1 Overview of water scarcity in China by province	2
Figure 1.2 Freshwater resources & withdrawal in northern China provinces/province-level municipalities, 2013	3
Figure 1.3 Freshwater resources & withdrawal in southern China provinces/province-level municipalities, 2013	4
Figure 1.4 Distribution of selected industrial products between China's southern and northern regions	5
1.1.2 Environmental regulations	6
Figure 1.5 Selected industry-related regulations and policies on industrial water/wastewater in 2012–2014	6
Figure 1.6 Selected industry-related regulations and policies on industrial water/wastewater in 2015	6
1.1.2.1 Water Pollution Action Plan	7
1.1.3 Industrial water allocation	7
Figure 1.7 Freshwater withdrawal quota for selected industries	7
Figure 1.8 Difference between 2013 total water withdrawal and 2015 target withdrawal quota, by province	8
Figure 1.9 Current water withdrawal and targeted water withdrawal by province	8
1.1.3.1 Wastewater discharge standard	9
Figure 1.10 Execution date of individual discharge standards for selected industries	9
Figure 1.11 Comparison of old and new discharge standards for selected industries	10
1.1.3.2 New Environmental Protection Law and Enforcement	10
1.1.3.3 Third party industrial wastewater treatment	10
1.2 Market forecast	11
Figure 1.12 Capital expenditure on water and wastewater treatment by industry in China, 2013–2020	12
Figure 1.13 Industrial wastewater treatment projects, 2012–2015	13
Figure 1.14 Capital expenditure on industrial water and wastewater treatment in China, 2013–2020	13
2. Power generation	15
2.1 Market overview	15
Figure 2.1 Current installed power generation capacity by fuel type, 2012–2014	15
2.2 Drivers	16
2.2.1 Water scarcity	16
2.2.2 Environmental regulation	16
2.2.2.1 Water allocation and water reuse requirements	16
Figure 2.2 Maximum freshwater withdrawal quotas	16
2.2.3 Air pollution and wastewater discharge standards	16
2.3 Technology trends	17
Figure 2.3 Water and wastewater systems in Chinese power plants	17
2.4 Procurement process	18
2.5 Supply chain analysis	19
Figure 2.4 Main players in the water for power market	19
2.6 Market opportunities	19
2.6.1 Opportunities for ZLD technologies in FGD wastewater treatment	19
2.6.2 Accessing the market	20
2.7 Market forecast	21
Figure 2.5 Power generation: Capital expenditure on water and wastewater treatment, 2013–2020	21
3. Coal-to-chemicals	23
3.1 Market overview	23
Figure 3.1 Coal-to-chemical routes	23

Figure 3.2 Pipeline of CTX projects in China	24
Figure 3.3 CTX projects and coal reserves in China	24
Figure 3.4 Minimum capacity requirements for CTX projects	24
Figure 3.5 Volume of water needed for CTX projects	25
Figure 3.6 Capacity and production of CTX projects, 2013–2014	25
3.2 Market drivers	25
3.2.1 Growth of the CTX industry	25
Figure 3.7 China's dependence on imported crude oil	25
3.2.2 Water scarcity	26
Figure 3.8 Coal reserves and freshwater resources in coal-rich regions, 2013	26
3.2.3 Regulations	27
Figure 3.9 Regulations on freshwater withdrawal and wastewater discharge for CTX projects	27
3.3 Technology trends	27
Figure 3.10 Water balance in a CTX plant	27
Figure 3.11 Typical treatment train for biological wastewater treatment	28
Figure 3.12 Example of current wastewater technology treatment trains in CTX projects	29
3.3.1 Zero liquid discharge (ZLD)	29
Figure 3.13 Zero liquid discharge system	29
Figure 3.14 Existing and emerging technologies	30
3.4 Procurement process	31
Figure 3.15 Development of a CTX project	31
Figure 3.16 Engineering, procurement and construction process	31
Figure 3.17 Current coal-to-chemical ZLD EP(C) projects	32
Figure 3.18 Current CTX water BOT projects	33
3.5 Supply chain analysis	33
Figure 3.19 Major clients	33
Figure 3.20 Major EPC contractors	34
Figure 3.21 Wastewater treatment providers	34
3.6 Market opportunities	34
3.6.1 Current and future projects	35
Figure 3.22 Investment in coal-to-chemicals projects by province	35
Figure 3.23 Investment in coal-to-chemicals projects by product type	35
Figure 3.24 Number of online coal-to-chemical projects by region and product type	36
Figure 3.25 Number of planned coal-to-chemical projects by region and product type	36
Figure 3.26 Historical and planned investments in coal-to-chemicals projects by product type, 2000–2020	37
3.7 Market forecast	37
Figure 3.27 Coal-to-chemicals: Capital expenditure on water and wastewater treatment, 2013–2020	38
4. Refining and petrochemicals	39
4.1 Market overview	39
4.1.1 Refining and petrochemical production	40
Figure 4.1 China's crude oil throughput, 1998–2014	40
Figure 4.2 Crude oil processed in China, 2014	40
Figure 4.3 Production of refining products in China, 2007–2014	41
4.1.2 Geographical distribution of the refining and petrochemical industry	41
Figure 4.4 Refining capacity & distribution of PX projects & ethylene projects in three main economic rims	42
4.2 Market drivers	42
4.2.1 Environmental regulation	42
Figure 4.5 Freshwater withdrawal quota for selected industries	42
Figure 4.6 Target for reduction of pollutant discharge for the refining and petrochemicals industry	43
Figure 4.7 Implementation date for newly published discharge standards	43
Figure 4.8 Comparison of old and new standards for the refining and petrochemical industry	44
4.2.2 Upgrade of refineries to meet stricter petroleum product specifications	44
4.2.3 Refining and petrochemical industrial parks	44
Figure 4.9 Requirements for newly built refining and petrochemical facilities	45
4.3 Technology trends	45
4.3.1 Water systems	45
Figure 4.10 Treatment requirements for water systems in the refining and petrochemical industry	45
4.3.2 Wastewater treatment	45

Figure 4.11 Suggested wastewater treatment train by the MEP, effective from March 2015	46
Figure 4.12 Examples of refining and petrochemical wastewater treatment trains using MBR	47
4.3.3 Wastewater reuse	47
Figure 4.13 Wastewater reuse in the refining and petrochemical industry	48
4.4 Procurement process	48
Figure 4.14 Examples of EP(C) projects	49
Figure 4.15 Examples of JV projects	49
4.5 Supply chain analysis	50
4.5.1 Clients	50
Figure 4.16 Major clients	50
4.5.2 EPC contractors	50
Figure 4.17 Major EPC contractors	50
4.5.3 Water and wastewater technology providers	50
Figure 4.18 Major water and wastewater technology providers	50
4.6 Market opportunities	51
4.6.1 Current and future projects	51
Figure 4.19 Upcoming refinery construction projects, updated in May 2015	51
4.7 Market forecast	52
Figure 4.20 Refining & petrochemicals: Capital expenditure on water & wastewater treatment, 2013–2020	52
5. Industrial parks	53
5.1 Market overview	53
5.1.1 Industrial parks in China	53
Figure 5.1 Explanation of industrial park levels	54
5.1.2 Distribution of industries within industrial parks	54
Figure 5.2 Distribution of national level refining & petrochemical industrial parks in China by region, 2012	55
5.1.3 Water and wastewater management in industrial parks	55
Figure 5.3 Types of wastewater management system in industrial parks	56
5.2 Drivers	56
5.3 Technology trends	57
5.4 Procurement process	57
Figure 5.4 Wastewater treatment service contracts for the top 30 refining & petrochemical industrial parks	58
5.5 Supply chain analysis	59
Figure 5.5 International market players	59
5.6 Market opportunities	60
Figure 5.6 Industrial park PPP projects	60
6. Microelectronics	63
6.1 Market overview	63
Figure 6.1 China semiconductor industry revenue, 2003–2013	63
Figure 6.2 Worldwide semiconductor sales by region, 2014–2015	63
6.2 Drivers	64
6.3 Technology trends	64
6.3.1 Ultrapure water (UPW) systems	64
Figure 6.3 Process water treatment steps for UPW production	65
Figure 6.4 Technologies used in UPW production	65
6.3.2 Wastewater treatment	66
Figure 6.5 Typical contaminants present in the semiconductor manufacturing process steps	66
6.4 Procurement process	66
6.5 Supply chain analysis	67
Figure 6.6 Major players in the wastewater treatment market in the microelectronics industry in China	67
Figure 6.7 Breakdown of global fab equipment spending by region, 2015	68
6.6 Market opportunities	68
6.6.1 Opportunities in UPW treatment	68
6.6.2 Opportunities in wastewater treatment	69
6.6.3 Opportunities in wastewater reuse	69
Figure 6.8 Water scarcity in Chinese provinces with semiconductor manufacturing activity	69
6.6.4 Accessing the market	70
6.7 Market forecast	71
Figure 6.9 Microelectronics: Capital expenditure on water and wastewater treatment, 2013–2020	71

7. Pharmaceuticals	73
7.1 Overview	73
Figure 7.1 Pharmaceutical sales in China, 2011–2013	73
7.2 Drivers	73
7.2.1 Industry growth	73
7.2.2 Environmental regulations and corporate standards	74
7.3 Technology trends	74
7.3.1 Process water technologies	74
Figure 7.2 Typical process water treatment system in the pharmaceutical industry	74
Figure 7.3 Pharmaceutical grade waters	75
7.3.2 Wastewater treatment	76
Figure 7.4 Advanced wastewater treatment technologies	76
7.4 Procurement process	76
7.4.1 Procurement process for new projects	76
7.4.2 Procurement process for project upgrades	77
7.4.3 Key success factors	77
7.5 Supply chain analysis	78
Figure 7.5 Major players in the wastewater treatment market in the pharmaceutical industry in China	78
7.6 Market opportunities	79
7.6.1 Opportunities in UPW systems	79
7.6.2 Opportunities in wastewater treatment systems	79
7.6.3 Opportunities in water reuse	79
7.6.4 Current and future projects	80
Figure 7.6 Current and future pharmaceuticals projects in China	80
7.6.5 Accessing the market	81
7.7 Market forecast	82
Figure 7.7 Pharmaceuticals: Capital expenditure on water and wastewater treatment, 2013–2020	82
8. Other industries	83
8.1 Pulp & paper	83
8.1.1 Market forecast	83
Figure 8.1 Pulp & paper: Capital expenditure on water and wastewater treatment, 2013–2020	84
8.2 Food & beverage	84
8.2.1 Market forecast	84
Figure 8.2 Food & beverage: Capital expenditure on water and wastewater treatment, 2013–2020	85
8.3 Steel	85
9. Market players	87
Figure 9.1 Top 120 Chinese industrial players	87
Figure 9.2 Selected Chinese membrane manufacturers	92
Figure 9.3 Selected international investments in the Chinese industrial water sector	92
