

# India Water Markets

<b>Publication information</b>	<b>ii</b>
<b>Executive summary</b>	<b>iii</b>
Capital expenditure on water and wastewater in India, 2013–2020	iii
Municipal sector	iii
Industrial sector	iv
Capital expenditure on water and wastewater treatment by industry in India, 2013–2020	v
<b>1. Introduction</b>	<b>1</b>
1.1 Overview	1
1.2 Market drivers	1
1.2.1 Tackling pollution	2
1.2.1.1 Deficit in wastewater treatment capacity	2
Figure 1.1 Wastewater treatment capacities and generation across India, 2015	2
1.2.1.2 Pollution of freshwater resources	3
Figure 1.2 Number of polluted river stretches in each priority class by state (data from 2009–2012)	4
1.2.1.3 New regulations	4
Figure 1.3 Wastewater discharge standards for treatment plants	5
1.2.1.4 Industrial pollution	5
1.2.2 Water scarcity	6
Figure 1.4 Groundwater resource availability, withdrawal and utilisation rate, 2009	6
Figure 1.5 Water stress in India	7
1.2.3 Industrialisation	7
1.2.4 Urbanisation	8
1.3 Market opportunities and challenges	8
1.3.1 Market opportunities	8
1.3.2 Challenges of the market	8
1.4 Market forecast	9
Figure 1.6 India water market utility and industrial capital expenditure, 2013–2020	10
Figure 1.7 India water market: water and wastewater capital expenditure, 2013–2020	10
Figure 1.8 Capital expenditure on water and wastewater treatment by industrial sector in India, 2013–2020	11
Figure 1.9 Industrial forecast breakdown by equipment category, 2013–2020	12
<b>2. Utility water sector</b>	<b>13</b>
2.1 Overview	13
2.2 Drivers	13
2.3 Water sector structure and organisation	14
2.3.1 Government ministries and agencies	14
Figure 2.1 Organisational structure of water and wastewater management in India, 2015	14
2.3.2 The centre	15
Figure 2.2 Central government agencies involved in the water and wastewater sector	15
2.3.3 State governments	16
Figure 2.3 Independent water utilities across India	16
2.3.4 Water finance	16
2.4 National initiatives	16
2.4.1 River Ganga clean-up	16
2.4.1.1 Wastewater generation and treatment in the Ganga Basin	16
Figure 2.4 Towns and pollution zones along main stem	17
Figure 2.5 Ganga main stem sewerage needs	18
2.4.1.2 Key aspects and objectives of the Ganga River Basin Management Plan	18
2.4.1.3 GRBMP recommendations	19
2.4.1.4 Market opportunities	19
2.4.1.5 Estimated expenditure	20
2.4.1.6 Yamuna Action Plan	21
Figure 2.6 Wastewater treatment plants for Delhi (Dhansa to Goyla)	21

Figure 2.7 Wastewater treatment plants for Delhi (Goyla to Keshopur)	21
2.4.1.7 Ongoing projects	22
Figure 2.8 Status of approved projects under the NGRBA	22
2.4.1.8 Private sector participation	23
2.4.2 Smart Cities Mission	23
Figure 2.9 Number of smart cities allocated to States and UTs	24
Figure 2.10 100 Smart Cities implementation process	24
2.4.3 Atal Mission for Rejuvenation and Urban Transformation (AMRUT)	25
2.4.3.1 Programme purposes and components	25
Figure 2.11 AMRUT's components related to water and wastewater sectors	25
Figure 2.12 Number of cities in each state covered by AMRUT	26
Figure 2.13 Service level indicators and benchmarks	27
2.4.3.2 Reform implementation	27
2.4.3.3 Investment in water and wastewater sectors	27
Figure 2.14 Investments under JNNURM and estimated expenditure under AMRUT	27
Figure 2.15 Progress on water, wastewater and drainage projects approved under JNNURM, August 2014	28
2.4.3.4 Continuous (24/7) water supply projects	28
Figure 2.16 Main PPP projects on continuous water supply in India	28
Figure 2.17 Future 24/7 projects in India	29
2.4.4 National Rural Drinking Water Programme (NRDWP)	29
2.5 Technology trends	30
2.5.1 Water treatment	30
2.5.2 Wastewater treatment	30
Figure 2.18 Treatment technologies in WWTPs, 2015	30
2.5.3 Sludge treatment	30
2.6 Wastewater reuse	31
2.6.1 Projects	31
Figure 2.19 Upcoming wastewater reuse projects	32
2.7 Utility desalination	33
Figure 2.20 Top plants for utility and public sector clients	33
2.7.1 Solar desalination	34
2.7.2 Upcoming projects	34
Figure 2.21 List of planned municipal desalination projects	34
2.8 Residential point-of-use market	35
2.9 Market dynamics	35
2.9.1 Roles of market players	35
2.9.1.1 Consulting engineers	36
2.9.1.2 EPC contractors	36
2.9.1.3 Private operators	36
2.9.1.4 Equipment suppliers and technology providers	36
2.9.1.5 Players with more than one role	36
Figure 2.22 Market players in the utility sector	36
2.9.2 Procurement process	36
2.9.3 Accessing the market	37
2.10 Market forecast	38
Figure 2.23 Capital expenditure on water utilities in India, 2013–2020	39
Figure 2.24 Capital expenditure on wastewater utilities in India, 2013–2020	39
Figure 2.25 Utility forecast breakdown by equipment category, 2013–2020	40
<b>3. Power generation</b>	<b>41</b>
3.1 Market overview	41
Figure 3.1 Installed power generation capacity by fuel type, 2013–2015	41
Figure 3.2 Energy and power demand, generation and deficit, 2009–2016	42
Figure 3.3 Contracted and installed capacity in the Indian thermal power sector, 2004–2014	43
Figure 3.4 Total installed capacity by end user, 2015	43
3.2 Market drivers	44
3.2.1 Growth in power generating capacity	44
3.2.2 Water scarcity	44
Figure 3.5 Distribution of thermal power plants and water stressed areas in India	45

3.2.3 Environmental regulation	45
3.2.3.1 Water allocation and water reuse requirements	46
Figure 3.6 Proposed water withdrawal limits for thermal power plants	46
3.2.3.2 Wastewater discharge limits	46
Figure 3.7 Effluent discharge standards for thermal power plants	47
3.2.3.3 Air pollution regulation	47
Figure 3.8 Proposed air emission limits for thermal power plants	47
3.2.4 Cost of water	48
3.3 Technology trends	48
Figure 3.9 Water and wastewater systems in Indian power plants	48
3.4 Procurement process	49
3.5 Supply chain analysis	50
Figure 3.10 Main players in the Indian water for power market	50
3.6 Market opportunities	51
3.6.1 Accessing the market	51
3.7 Market forecast	52
Figure 3.11 Power generation: Capital expenditure on water and wastewater treatment, 2013–2020	52
<b>4. Refining &amp; petrochemicals</b>	<b>53</b>
4.1 Overview	53
4.1.1 Refining and petrochemical capacity and production	53
Figure 4.1 Refinery capacity and crude throughput	53
Figure 4.2 Company share of refining capacity in India	54
Figure 4.3 Locations of refineries in India	55
Figure 4.4 Petrochemical production in India, 2006–2014	56
Figure 4.5 PCPIR locations and anchor tenant	56
4.2 Drivers	57
4.2.1 Environmental regulations	57
Figure 4.6 Effluent standards for oil refineries, 2008	57
Figure 4.7 Effluent standards for petrochemicals (basic & intermediates)	58
4.2.2 Water allocation and reuse	58
4.2.3 Increasing production and use of cheaper crudes	58
4.3 Technology trends	59
4.3.1 Water treatment systems	59
Figure 4.8 Treatment requirements for water systems in refining	59
4.3.2 Seawater desalination	59
4.3.3 Wastewater treatment systems	59
4.3.4 Wastewater reuse	60
4.4 Procurement process	60
4.5 Supply chain analysis	61
Figure 4.9 Major players in the water for refining market	61
4.6 Market opportunities	61
4.6.1 Accessing the market	62
4.7 Market forecast	63
Figure 4.10 Refining & petrochemicals: Capital expenditure on water and wastewater treatment, 2013–2020	63
<b>5. Pharmaceuticals</b>	<b>65</b>
5.1 Market overview	65
Figure 5.1 Exports of medicines and pharmaceutical products, 2011–2013	65
Figure 5.2 Indian pharmaceutical market revenue by product segment, 2013	65
5.2 Market drivers	66
5.2.1 Market growth	66
5.2.2 Compliance with process water quality standards	66
Figure 5.3 Pharmacopoeia requirements for purified water	67
Figure 5.4 Pharmacopoeia requirements for water for injection	67
5.2.3 Environmental regulation	68
5.2.3.1 Wastewater discharge regulation	68
Figure 5.5 Effluent discharge standards for the pharmaceutical industry, 2009	68
5.2.3.2 Water reuse requirements	68
5.2.4 Water scarcity	69

Figure 5.6 Water stress in Indian states with pharmaceutical manufacturing units	69
5.3 Technology trends	70
5.3.1 Process water technologies	70
Figure 5.7 Typical process water treatment system in the pharmaceutical industry	70
5.3.2 Wastewater treatment	71
Figure 5.8 ZLD treatment systems for the pharmaceutical industry	71
5.4 Procurement process	72
5.5 Supply chain analysis	72
Figure 5.9 Major players in the water for pharmaceutical market in India	72
5.6 Market opportunities	73
Figure 5.10 Pharmaceutical projects in India	74
5.6.1 Accessing the market	74
5.7 Market forecast	75
Figure 5.11 Pharmaceuticals: Capital expenditure on water and wastewater treatment, 2013–2020	75
<b>6. Industrial parks/clusters</b>	<b>77</b>
6.1 Market overview	77
Figure 6.1 CETPs by state	78
6.1.1 Industrial corridors	79
6.1.1.1 Delhi-Mumbai Industrial Corridor	79
Figure 6.2 Proposed investment regions in DMIC	79
Figure 6.4 Map of DMIC and nodes being developed	80
6.1.1.2 Other industrial corridors	81
Figure 6.5 Progress of other industrial corridors	81
6.1.2 Water and wastewater management	81
Figure 6.6 Water and wastewater demand in selected DMIC projects	81
Figure 6.7 Funding scheme for CETPs	82
6.2 Regulations	82
Figure 6.8 Selected treated effluent quality standards for CETPs	82
6.3 Drivers	83
6.4 Technology trends	83
6.5 Procurement process	84
6.6 Supply chain analysis	84
6.7 Market opportunities	85
6.7.1 Upcoming projects	86
Figure 6.9 Upcoming projects for industrial parks	86
<b>7. Other industries</b>	<b>87</b>
7.1 Steel	87
Figure 7.1 Steel production and capacity in India, 2015	87
7.1.1 Market forecast	88
Figure 7.2 Steel processing: Capital expenditure on water and wastewater treatment, 2013–2020	88
7.2 Food & beverage	89
Figure 7.3 Mega Food Park projects to be developed during phase III of the scheme	90
7.2.1 Market forecast	91
Figure 7.4 Food & beverage: Capital expenditure on water and wastewater treatment, 2013–2020	91
<b>8. Market players</b>	<b>93</b>
8.1 Analysis of local EPC companies	93
Figure 8.1 Industry icons	93
Figure 8.2 Expertise icons	93
8.1.1 Integrated service providers	93
8.1.2 Large EPC players	94
Figure 8.3 Key local players in the Indian water and wastewater market	94
8.1.3 Medium-sized players	98
Figure 8.4 Medium-sized local players in the Indian water and wastewater market	98
8.1.4 Consultants	107
Figure 8.5 Local consultants in the Indian water and wastewater market	107
8.1.5 Niche and smaller players	109

Figure 8.6 Niche and smaller Indian water and wastewater players	109
8.2 Market trends	114
8.2.1 Diversification	114
8.2.2 Partnerships between local and foreign players	114
Figure 8.7 Examples of partnerships between local and international players	115
8.3 International players	115
8.3.1 EPC contractors and systems integrators	115
8.3.2 Consultants	115
8.4 Equipment suppliers	116
